WHAT STUDENTS ARE SAYING ...

"My favorite things about Florida Tech are the instructors, the staff, the convenient location to PAX River, and that it was easy to put my GI bill to work toward the payment."
— Brandon E., M.S. Management – Acquisition & Contract Mgt

"I had been putting off a master's degree, but my co-workers proved that FIT had manageable programs where students still had time for themselves, and I decided it was the right time for me."
— Robert R., M.S. Acquisition & Contract Management

"The faculty at FIT are very well versed in relevant business issues. I benefit by being here and not just being a part of a generic university that is removed from defense, contractors and military, and I think that was a hidden surprise."
— Jessica C., MBA

MESSAGE FROM THE FIT PATUXENT SITE DIRECTOR

Welcome to the Florida Tech graduate center at the Patuxent Naval Air Station. Our graduate degree programs are quite broadly based to assist with your career and professional development. We offer many workforce-relevant graduate and undergraduate degree programs.

As a new student, you can enroll in one course in your first semester before completing the application process. Under this option, you can be taking one graduate course in your area of interest while your application for admission is being processed.

Florida Tech has been offering graduate degree programs at Patuxent Naval Air Station to military, civilian and contractor personnel since 1972. Classes are offered face-to-face in the classroom on base at Pax and in Web-based distance learning formats. This provides you with more flexibility as you plan for your career and professional development.

Robert R. “Bob” Schaller, Sr., Ph.D., MBA
